

NEW JERSEY
AMERICAN WATER

WE KEEP LIFE FLOWING™

BE SAFE. SLOW DOWN IN WORK ZONES.

Your safety, as well as the safety of your neighbors and our workers, is important to us! We work hard to keep our job sites safe, and we appreciate your effort to slow down and use caution around the construction site.

WE'RE INVESTING \$4 MILLION IN MILLBURN

MAIN REPLACEMENT PROJECT TO START SOON

New Jersey American Water is preparing to replace approximately 7,000 feet of aging 24-inch water main that was installed in the 1910s with new 30-inch ductile iron main along **Parsonage Hill Road** (from White Oak Ridge Road to Old Short Hills Road). In addition, we'll be installing a new 8-inch main along **Parsonage Hill Road** (from Chapel Hill Road to Denman Court) that will run parallel to the 30-inch main, and customers along that section of road will be connected to the new 8-inch main.

The project also includes replacing fire hydrants and utility-owned service lines along the pipeline route (see reverse for more information about service lines). There are parallel mains in the street and only customers from Chapel Hill Road to Denman Court are connected to the affected main. Affected customers will receive an additional notice prior to their service being replaced. We'll also be installing a meter pit at the curb area for affected customers in our right of way. After installation, all that will be visible is a 15-inch circular cover that will be flush with the ground.

The project represents a critical investment for the company in support of our commitment to provide customers with safe, reliable water service.

PROJECT START/END AND WORK HOURS

Weather permitting, our contractor, Vollers Excavating, will begin work on the first phase mid-December and be completed by mid-January. The overall project is expected to be completed in May and additional notices will be handed out before the next phase of the main replacement.

Work hours will be from 9 a.m. to 4 p.m., Monday through Friday. Work on weekends and after hours is not expected unless required to maintain project schedule. Daily updates will be provided to the town as to what areas of Parsonage Hill will be affected that day.

Final street restoration will be completed by Essex County in the summer of 2018.

ACCESS TO THE METER

Once the meter pits are installed, and the entire project is complete, we'll contact the affected customers set up an appointment to move the meter from inside the property to the meter pit. To perform this work, we'll need to gain access to the existing water meter located inside your property, so we may relocate it to the new meter pit. There is no cost to you to have this work performed. The relocation of the meter should take approximately 20 - 30 minutes.

HOW TO PREPARE

To prepare for the removal of the meter from inside your property, we ask that you clear the area to the water meter for safe and easy access. During the process of the meter relocation the water service will be interrupted for a few minutes.
