OWNER

RE: Solar Panel Installation Registration

Dear Sir/Madam:

I am writing to inform you that New Jersey requires all solar panel installations to be registered with the local fire department. The law requires the local fire chief to keep certain information on file. When the installation is complete, the Fire Chief asks that the following required information be forwarded to him on our enclosed registration form:

1. The address of the property and the name and contact information of the occupant(s) upon which the solar photovoltaic system has been installed.
2. The name, address and contact information of the property owner(s) of said property (if different than the occupant) and any adjacent structures to which the solar photovoltaic system serves.
3. The year the solar photovoltaic system was installed.
4. The total number of solar photovoltaic system arrays.
5. The total number of panels.
6. The location of the solar photovoltaic system disconnect(s).
7. The name, address and contact information of the installer and/or company responsible for servicing the solar photovoltaic system.

For your convenience, a copy of the Millburn Fire Department solar panel registration has been included with this letter.

Please contact me with any questions. Thank you for your cooperation.

Sincerely,

Battalion Chief Thomas P. Pizzano, II, Fire Marshal
Millburn Fire Department
(973) 564-7759
